HubSpot Academy

Growth-Driven Design Certified

HANNAH MCEWAN

### PROFILE

I am an enthusiastic, hard working person with a passion for web development. I have experience working for an agency and internal companies. I thrive in fast-paced and creative spaces. I love being able to mix my creative mind with functionality and usability to create real life experiences for users in every website I am a part of building.

- Exam 98-361: MTA Software Development Fundamentals
- HubSpot Growth-Driven Design
- Antony Conboy UX UI Design Course

### EXPERIENCE

#### SOLAR SIGN SUPPLIES

September 2014 - August 2015

Apprentice Web Developer

Certifications Earned

Level 3 Extended Diploma in ICT Systems and Principles

Level 3 Diploma in Professional Competence for IT and Telecoms Professionals

Skills Learnt

HTML, CSS and WordPress

During my time at Solat Sign Supplies, I worked as the sole web developer in this small company. I worked there alongside my 3AAA apprenticeship, meaning daily I was putting into practice the web development skills I was learning. I worked on the main website changing the WordPress theme and building new site pages as part of my daily workload. I also worked alongside the marketing team regularly to help with social media marketing using HootSuite. Through working with the marketing team, I built and maintained the company blog.

#### WM REPLY

September 2015 - July 2019

Certifications Earned

Level 4 Software Developer

Exam 70-480: Programming in HTML5 with JavaScript and CSS3

Exam 98-375: MTA HTML5 Application Development Fundamentals

Exam 98-361: MTA Software Development Fundamentals

Skills Learnt

HTML/HTML5, CSS, SCSS/SASS, JavaScript & jQuery, Responsive Design, Bootstrap and Figma

Working at WM Reply from a young age helped me grow in confidence and mature as an individual. Working here exposed me to big companies where I was able to communicate with clients, perform demos and go on client on-site visits for meetings. As a SharePoint Developer, I naturally moved into the role of training Graduate Developers as they joined the team.

SharePoint Developer

During my time as a SharePoint Developer, I worked daily in HTML, CSS, JavaScript and taking advantage of the Bootstrap framework for building responsive intranets. Alongside my apprenticeship, I worked hard to learn the new technologies and spend time developing myself to become a better developer.

Front End UI Developer

Moving into the UX and Design department, I worked on several projects for EasyJet, JD Sports and Ferrero. For EasyJet, I built the UI prototype for the sitecore development team. For JD Sports, I worked alongside their development team to build the front end UI for an app they were rolling out. This is a project I am very proud about working on!

#### Inspiring Travel Company

July 2019 - Present

Front End Developer

In my current role, my day-to-day includes working alongside two back end developers and a SEO specialist.

During my time here, the biggest project I have worked on was creating the Spectate website from scratch. I worked alongside the designer where I then built the front end of the website. Since then, alongside testing using Hotjar and Google Analytics, we have been continuously developing the website so that we are getting a great user experience.

I have recently been working solely on the responsive design of the 4 websites that we manage as well as improving page layouts that aren't displaying good user experience.

Currently, due to the pandemic, I am on furlough. During this time I have continued to improve my knowledge and increase my understanding of the UX methodology. I have completed the UX UI Design course by Antony Conboy, and passed the HubSpot Growth-Driven Design exam. Completing these courses and exams have allowed me to learn the skills to be able to put the thought of a user into my work more proactively. Putting my skills to use, I have also been building my online portfolio to display my work - please see this here:
